For Your Business, Municipality, or Agency

Fleet Electrification Planning

The Mass Fleet Advisor program through MassCEC offers free technical assistance for business and nonprofits interested in electrifying medium- and heavy duty fleets. For more information, visit their website.

Support for Municipalities

Mass Green Communities provides funding for cities and towns. If you're a municipal employee, please reach out to your regional coordinator for more information.

Electrify Your Fleet and Maximize Your Savings

MOR-EV has rebates for your organization to electrify your fleet.

For pick-ups and class 2b vehicles (8,501 - 10,000 lbs), your business could qualify for rebates. Apply within 90 days of purchase for this rebate. Light duty rebates are also available through participating dealerships at point-of-sale.

For medium- and heavy - duty vehicles, you may qualify for rebates. To qualify, apply for a voucher prior to purchasing your fleet, and redeem within 12 months of purchase.

Fleets (public only) For public entities seeking to acquire electric vehicles for their fleets (provided by MassDEP/MassEVIP).

Funding to Install EV Charging Stations

MassDEP has several categories of incentives available for installing electric vehicle charging infrastructure.

Workplace & Fleet Charging

For employers and fleet operators.

Public Access Charging

For property owners and managers.

Multi-Unit Dwelling & Educational Campus Charging

For multi-unit dwellings with five or more units and educational campuses with at least 15

Commercial & Fleet Utility Rebates

Eversource and National Grid offer funding for the electrical infrastructure costs associated with EV chargers when you meet qualifications.

National Grid

Eversource

Unitil

For You and Your Home

Drive Electric, Save Big!

Visit the MOR-EV website for a list of vehicles that qualify for rebates through purchase or lease.

Residential Utility Rebates

Your utility may offer incentives and programs as well. Check out information for Eversource and National Grid below.

Eversource has a rebate for you to install EV charging in your home. Visit their website for more information.

National Grid has EV charging installation rebates and additional savings for off-peak charging. To qualify you must enroll in their off-peak charging program.

Unitil's Ready2Charge program offers rebates to help customers get ready to charge.

Not an Eversource or National Grid customer? Find out what electric utility serves you and if EV incentives are available.

Clean Transportation Programs Provided by MassCEC

MassCEC provides multiple programs to incentivize electric transportation

RideCleanMass Incentives for high mileage, taxi and TNC drivers to purchase new or used electric vehicles.

E-bike Program Rebates for the purchase of e-bikes.

Plan Your Travel

As you add electric or alternative fuel vehicles to your fleet or home life, charging and refueling on the go is important. Visit PlugShare or Alternative Fuels Data Center to locate charging and fueling stations.
